

SKILLS: JavaScript, Ruby, HTML, CSS, React, Redux, jQuery, Ruby on Rails, SQL, PostgreSQL, Mongoose, MongoDB, Node.js, Express.js, Webpack, Git, Heroku

PROJECTS:

RobinsJacket

[live](#) | [github](#)

PostgreSQL, Ruby on Rails, React / Redux, JavaScript, CSS3, BCrypt, [IEX Cloud API](#), [NewsAPI](#), [Recharts API](#)

RobinsJacket is a single-page, modular, full-stack app clone of Robinhood Markets

- Engineered utilizing BCrypt for secure password hashing, session cookies for login persistence, and react-router for protected routes and authentication
- Created dynamic data visuals implementing Recharts API that toggles gain/loss colors and adjusts the YAxis domain for stock price high/low to render relevant and easy to digest first-glance information for the user.
- Optimized queries and obtained data for multiple sections; reducing database and endpoint calls, minimizing load times
- Built an added portfolio component that maintains its own internal state using React Hooks to simplify code (such as DRY lifecycle methods with more readable cleanup) and to remove boilerplate lines like constructor initialization. Features joins tables with a PostgreSQL database and self-derived calculations for a one-stop overview of investments

openFridge

[live](#) | [github](#)

MongoDB, Express.js, React, Node.js, CSS3, Axios, [recipe-scraper](#), [Ingredient Parser](#), [pure-react-carousel](#)

openFridge is an Express and React based app that helps users find recipes based on ingredients available in their kitchen

- Formulated and executed a collaborative MERN stack app with a team of four engineers, coordinating the Git Workflow between the frontend and backend
- Researched technology that parses ingredient strings for recipe CRUD functions, returning the formatted recipe object in order to easily filter a subset of recipes based on user input - with search options for one or multiple inputs

RepairShop

[live](#) | [github](#)

HTML, CSS3, Webpack, JavaScript

RepairShop is a scalable, JavaScript based web application designed to promote emotional growth in elementary level students through a variety of activities

- Devised interactive elements through DOM manipulation with vanilla JS using event handlers such as drag-and-drop for 'feelings', timing events for 'breathing', and CSS keyframes for transition animations for an engaging user experience for the target audience
- Partnered with educators and social workers to research and discover tools to guide elementary aged children through their emotional developmental growth

EXPERIENCE:

Client Services Coordinator & Claims Filing Director

Dec 2017 - Mar 2020

Assistant Damages Analyst

Jan 2015 - Nov 2017

Pomerantz LLP | New York, NY

- Orchestrated the recovery of \$30+M on behalf of 50~ clients resulting in \$2M in fees for the firm in a single settlement
